

EVOLENCE™

true beauty, all year long

The world of dermal fillers is evolving. A new injectable collagen-based treatment, EVOLENCE®, has re-launched in the UK. EVOLENCE® is a safe, natural and lasting product that is capable of smoothing out facial lines and wrinkles. People who want to revitalize their appearance and bring back the structure of younger skin can now choose a solution that doesn't need costly repeat treatments every few months. With its patented GLYMATRIX™ technology, EVOLENCE® lasts for up to 12 months. EVOLENCE® has an excellent safety profile with no need for a skin test and breaks down naturally over time, just like the body's own collagen.

When Jane, a 60-year-old mother of two, noticed a deepening of the lines around her mouth, she sought the help of the experienced professionals at MBNS Clinic in Thame, Oxfordshire. MBNS have over 14 years experience in the field of aesthetic nursing and are the leading clinic in Oxfordshire. Upon consultation, it was revealed that since the loss of her husband, Jane felt her looks had suffered. With her daughter's wedding coming up Jane wanted to look her best and reclaim her good looks. She was advised by Senior Nurse Specialists Marea Brennan Thorns (RGN, NIP) and Stephanie Green (RGN) on having a soft tissue augmentation procedure that would not only smooth away her lipstick lines, but replace the lost collagen in Jane's skin that was causing a tired, sad look.

To rejuvenate Jane's face, two syringes of EVOLENCE® BREEZE™ was injected around the mouth and cheek areas. The simple treatment took a few minutes, produced immediate results and will last for up to one year. A little wrinkle relaxant was also injected around the mouth area.

Collagen plays a significant part in almost every function of the body, supporting, strengthening and helping to smooth out facial imperfections. Evolence® is injected where the body's own collagen has been weakened, typically in facial wrinkles. The injected material fills in the missing collagen and thereby raises and smoothes out the depressions of the face.

EVOLENCE® (www.evolence.com) is available throughout the UK from leading aesthetic medicine clinics such as MBNS Clinic in Thame.

If you require further information in regards to this and other treatments offered at the MBNS Clinic, kindly visit their website at www.mbnsclic.co.uk, or alternatively phone them to book a consultation on 01844 213007 or email at info@mbnsclic.co.uk.
